

INTERNATIONAL MOVEMENTS

Uniloads undertakes a proportion of its movements outside the UK, safely collecting or delivering vehicles into mainland Europe. Our Special Projects Team carefully manage and control all elements of the movement including flights, ferries, routes, fuel documentation and insurance. Generally, vehicles tend to be 'specialist' either being large in size or high value. These often include coaches, concrete pumps, fire appliances and aircraft equipment.

CASE STUDY:

Customer 'X' calls Uniloads at 3:30pm on Tuesday with a request to move a vehicle from Herne in Germany to Dublin, in the Republic of Ireland, for Friday. Uniloads Special Projects Team arrange flights from Stanstead, select a qualified driver (with valid passport) and brief him accordingly. Ferries are booked for both the channel crossing and from Holyhead to Dublin. Driver collects vehicle from the factory and fuels enroute before catching an overnight sailing from Zeebrugge to Immingham. Driver drives 250 miles to Holyhead to catch the next ferry to Dublin, and the vehicle is safely delivered at 8:90am Friday morning. Customer is able to track order progress at www.uniloadsonline.co.uk and to view POC (Proof of Collection) and POD (Proof of delivery) receipts with dates, times and signatures. Driver catches a return flight from Dublin to Liverpool to make this next collection in St. Helens.

For more information on this or other Special Projects services emails us at info@uniloads.co.uk or call our Customer relationship Team on 01925 650650.
